

# G100 Wireless Handheld

## Introducing the G100 Wireless Handheld, A Powerful and Compact Synchronized Messaging Device

Introducing the G100 wireless handheld from Good™ Technology. The G100 is a powerful, compact and sophisticated breakthrough in wireless handhelds that pioneers the new category of Synchronized Messaging Devices. Small enough to carry at all times, the G100 provides mobile professionals with a highly-portable handheld for robust wireless access to a wealth of corporate information. Its sophisticated design features both a clear, crisp grayscale display screen and an ergonomically designed thumb keyboard for a superior typing experience on a small form-factor handheld. The result is a superior user experience, with no cradle required.

Powered by GoodLink™ wireless corporate email and data system, the G100 delivers a continuously synchronized wireless connection to Microsoft Exchange Server®-based data. It enables users to instantly access up-to-date corporate email, secure attachments, contacts, calendar, notes and tasks when mobile. GoodLink provides a complete and secure wireless solution for connecting to corporate messaging accounts safely through the firewall. The G100 also features GoodInfo™ wireless information system software, for accessing vital company data stored in Web-based applications and other Internet information.

**G100 Wireless Handheld**

## Advantages

- **Compact** – the G100 is highly portable making it easy to carry at all times. It is small enough to be carried on a belt or in a pocket while providing a large, high-resolution display and full, built-in Qwerty thumb keyboard. Intuitive one-handed navigation enables easy scrolling and left or right hand use.
- **Powerful** – the G100 keeps users connected to corporate information. Its superior wireless radio and optimized antenna performance keep users in touch via improved transmission in buildings and in intermittent wireless coverage.
- **Synchronized** – the G100 leverages GoodLink System software and Cingular nationwide wireless service, to deliver a continuously synchronized wireless connection to messaging, organizer and company data, with no cradle required.
- **Sophisticated** – the G100 blends ergonomic engineering with an elegant, simple design. Highly functional and durable, the G100 is built to withstand the demands of busy executives

## Features

- **Clear, crisp grayscale display screen** – The G100 maximizes viewable data on a small form factor device with a high-resolution, 212 x 138 pixel screen that can display up to 12 lines of text. A 16-level grayscale screen delivers the richness of color in a low-power alternative.
- **Quick-type thumb-board** – An ergonomically designed Qwerty thumb keyboard enables a superior thumb typing experience on a small form-factor device. The V-shaped layout and contoured key shape on the G100 work together to create an intuitive keyboard with positive tactile feedback for fast, efficient typing on the go.
- **Center-mounted scroll bar with left and right buttons** – Unique and easy-to-find navigation controls provide quick, intuitive, and easy one-handed navigation of the G100. A center-mounted scroll wheel enables one-handed navigation with either the right or left hand. Integrated left and right buttons make navigating calendar entries and editing text intuitive and fast. Additional command buttons – including Home, Escape and Menu – further improve navigation speed.
- **Portable, with optimal screen size** – The G100 is the perfect balance of portability and readability. Designed to be small enough to conveniently carry in a holster, a pocket, or a purse, the G100 maximizes screen size for easy viewing.
- **Backlit screen and keyboard** – For improved visibility in low-light environments, the G100 includes a backlight feature that can illuminate both the screen and the keypad so users can keep reading and typing.
- **GoodLink Applications software** – The G100 is powered by GoodLink Applications software and GoodLink Service to provide a complete package for continuously synchronized wireless corporate email and data access. The GoodLink System provides wireless synchronization between the G100 and the user's Microsoft Exchange Server account with no cradle required.
- **GoodInfo Applications software** – The G100 also includes the optional GoodInfo Applications software so users can wirelessly access Web-based applications and information right from their handheld. GoodInfo makes it easy to request information via simple queries and receive responses via email – both from corporate applications and from popular Web sites. GoodInfo is optimized for today's wireless networks, making the requested information available to users either offline or online.

## Specifications

Size	72 x 99.5 x 16 mm (2.8. x 3.9. x 0.6 in.)
Weight	130g (4.6 oz.)
Processor	ARM-based processor
Memory	8MB Flash Memory, 16MB RAM
Battery	Internal Rechargeable Lithium Polymer
Notification	Notification Tones; LED and Vibrate
Accessories	Power Cable USB Cable Holster
