

Fast Access to Patient Records Means More Time for Patient Care

A HEALTHCARE INFORMATION SOLUTION FEATURING CITRIX PASSWORD MANAGER AND FUSION FROM CAREFX

Clinicians typically spend 30 percent of their day gathering and organizing patient data according to IDC. Making a diagnosis and designing a treatment plan often entail the use of multiple clinical applications, each with its own sign-on procedure, passwords and access process, and patient selection process. Time spent navigating this maze is time diverted from direct patient care.

Healthcare organizations need a solution that gives clinicians fast, easy and convenient access to required information. At the same time, this solution must ensure the security and confidentiality of patient data. The integration of Citrix Password Manager™ and Fusion from Carefx™ is just what the doctor ordered.

By enabling clinicians to securely access multiple applications with a single logon, Citrix Password Manager streamlines the process of connecting to patient information. In addition, the Hot Desktop feature of Password Manager makes it easy to switch users at shared workstations, such as those in patient rooms. With Hot Desktop, users logon and logoff in seconds, not minutes, under their own identities. When Password Manager is deployed with Citrix Presentation Server™, clinicians can extend the value of Hot Desktop by using it with the SmoothRoaming™ capability of Presentation Server. SmoothRoaming facilitates continuous access to information when moving between workstations: it enables an application to open on a new device in the same state — such as a specific field — where the clinician left off.

Fusion from Carefx further accelerates access to patient records. This context management technology makes it easy to aggregate information relating to a particular patient regardless of where the data is stored. After a patient is selected in one application, all applications within the system automatically synchronize to that individual's data. Fusion provides the physician with a holistic view of the patient's medical history, right at the point where critical care decisions are being made. No more tedious hunting for patient data: it comes to you.

POINT-OF-CARE ACCESS FOR CLINICIANS

The integration of Citrix Password Manager enterprise single sign-on software and the context management capabilities of Fusion from Carefx provides simple, secure access to aggregated patient information at the point of care for improved decision-making.

CLINICIAN BENEFITS

- Improved clinical decision-making and patient safety by simplifying access to a patient's complete clinical record

Context Management and Enterprise SSO Seamlessly Integrated

- Clinicians do not need to register ESSO credentials separately for each application
- Clinicians receive access to all password-protected application with a single logon, even in a mixed environment of context-enabled and non context-enabled applications

Rapid Access to Patient Information

- Automated aggregation of patient data
- Access to multiple applications with one set of credentials
- Rapid user switching between shared workstations

Support for Regulatory Compliance

- Stronger password management
- Comprehensive, centralized, and application-neutral audit log

- Ability to spend more time on direct patient care rather than information-gathering and IT issues
- Increased ease of use with single sign-on access to all clinical applications instead of logging onto each application individually
- Greater mobility with Hot Desktop, which enables fast, secure switching from one user to another at shared workstations, and SmoothRoaming, which enables a clinician's open applications to be locked and then follow from room to room or workstation to workstation at the precise point where they left off.

SECURITY AND MANAGEABILITY FOR IT ADMINISTRATORS

Citrix Password Manager and Fusion from Carefx offer important advantages to IT. By improving the security of clinician access, even on shared workstations, and providing an audit trail, the combined solution strengthens compliance with HIPAA and other regulations. Further, it is easy to integrate with clinical applications.

IT BENEFITS

- Encourages adoption of new technology by clinicians, who enjoy the intuitive nature of the solution
- Increases return on IT investment by promoting greater use of applications such as electronic medical records
- Interoperates with clinical applications offered by leading HIT vendors
- Supports regulatory compliance by providing logout timers and logout synchronization when smartcards are removed or proximity badges move out of range, as well as providing a comprehensive and centralized audit trail of patient information access
- Deploys and configures quickly and efficiently in a non-disruptive and cost-effective manner

SOLUTION COMPONENTS

- Citrix Password Manager — the most secure, efficient, and easiest-to-deploy enterprise single sign-on solution for easy access to Windows, Web, and Host-based applications with a single logon.
- Citrix Presentation Server — the industry-leading application virtualization software, providing fast, secure access to applications from any device — the best solution for client server applications.
- Fusion from Carefx — the industry's only open and scalable Patient Information Aggregation platform, providing clinicians with unified access to data residing in disparate applications.

About Carefx: Carefx is the only provider of an open and scalable Patient Information Aggregation platform that provides clinicians real-time access to information residing in disparate applications. Fusion from Carefx™ aids clinicians with sleek, intuitive and flexible access to patient information and satisfies IT imperatives by fully leveraging legacy investments within an open architecture.

Best Access Experience. Anytime. Anywhere.

About Citrix: Citrix Systems, Inc. (Nasdaq:CTXS) is the global leader and most trusted name in on-demand access. More than 180,000 organizations around the world rely on Citrix to provide the best possible access experience to any application for any user. Citrix customers include 100% of the *Fortune* 100 companies and 98% of the *Fortune* Global 500, as well as hundreds of thousands of small businesses and individuals. Citrix has approximately 6,200 channel and alliance partners in more than 100 countries. Citrix annual revenues in 2005 were \$909 million. Learn more at www.citrix.com.
