NetManage: Flat Rate IT Services

When your business suffers from technology problems, your productivity and profits suffer as well – wouldn't it be nice if you had an IT department to handle those IT issues? Sure, but with Preferred Technology Solutions you gain much more than just an IT department – you gain IT support, IT management, and an IT partner.

Our Process

Business operations will always run optimally because our NetManage service process stabilizes your technology. Our four simple steps will improve your business' daily operations so that your business can become an even greater success.

1. Our enterprise-level engineers talk to you and get to know your business.
2. Through analyzing your specific business needs, we develop a custom, effective solution fit for your unique business.
3. We put your custom solution in place to prevent data and information loss, eliminating issues before they even occur.
4. We tailor to your budget and offer you the best possible options for your business.

We Know the Business

We are highly trained, highly skilled experts who are in the business of bettering and managing technology. You can trust us to handle your critical data, so that you don't

have to. Waiting until technology breaks only creates even more issues down the road when it happens – we're here to ensure that your technology is always running optimally so that your business stays on track to reaching goals – all at a flat rate.

We monitor your network 24/7, 365 days a year so you'll always know that your network is secure. Even after your custom solution is implemented, we continue to make sure that your network is running at its best.

By monitoring your system, we receive alerts so we can stop problems before they even exist, saving your business stress, time and money.

Watch Profits and Productivity Increase

Your downtime will decrease and your uptime will increase with our proactive support, network monitoring and security procedures that keep your files and information safe from hackers, giving you more free time to focus on your long-term business goals. We have helped our clients save as much as \$250,000 per year by reducing their downtime alone.

Our flat rate model let's you budget each month, rather than coming up with funds at the last minute to pay for surprise maintenance and repairs. NetManage offers you a way to grow profits, increase productivity, and keep your network safe – all for a flat fee.
